

1 A)

retroviral vector

1 B)

genomic locus

1 C)

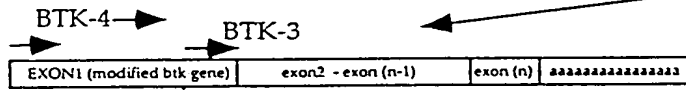

chimeric transcripts/cDNA synthesis

1)

expression of the resistance marker allows one to select cells that transcribe a second message

BTK-1
2)

rare-cutter (A)
restriction site

rare-cutter (B)
restriction site

GET-2N
GET-2
RTT-1

1 D)

TST vector
(e.g. lambdaPhage)
